## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-9 and 11-13 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1, 4-5, 8 and 12 recite among other features having a first memory to sequentially store the video data corresponding to each of the data lines in a first direction, a second memory to store first correction data which is obtained by, for each data line, multiplying each of the video data read out from the first memory by a predetermined coefficient and then sequentially accumulating the multiplied data in a second direction opposite to the first direction, and a third memory to store second correction data as the cumulative value for each of the data lines, the second correction data being obtained by, for each data line, sequentially accumulating the first correction data read out from the second memory in the first direction.

However, Yamamoto et al (JP 07264591) discloses writing into memory in alternating directions (Drawing 2).

Yamamoto does not disclose storing first correction data obtained by multiplying each of the video data read out from the first memory by a predetermined coefficient and then sequentially accumulating the multiplied data in a second direction opposite to the first direction and storing second correction data obtained by sequentially accumulating the first correction data read out from the second memory in the first direction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
